EXPERIENCE

Pelican New Orleans - Web Developer - April 2025 - present

JavaScript, React.js, NextJs, NodeJs, ExpressJs, Wordpress, SQL, PostgreSql, Power BI, Google Tag Manager

- Developed automated financial reports with Power BI to provide high-level insights of their client base.
- Configured Google Tag Manager to track revenue / ad spend for a multi-site organization.
- Transferred an old site from Wordpress and JQuery to NextJs to improve load speed and SEO.
- Maintained their suite of websites, including 2 NextJs sites and 5 Wordpress sites.
- Developed NodeJs services to trigger Mailchimp email marketing flows triggered by customer actions.

MyCritters (internship) - Full Stack Developer - June 2024 - April 2025

TypeScript, React.js, Lexical.js, Tailwind Css, Node.js, Hasura, GraphQL, Apollo, PostgreSQL, Docker

- Developed a wysiwyg rich-text editor to create, view, update, and save formatted documents. Key features include version control, url-based routing, automatic key-word highlighting, and document parsing for database storage.
- Managed role-based permissions for the GraphQL api and created triggers on the PostgreSQL database.

Tymeline Inc. (internship) - Frontend Developer - August 2024 - November 2024

JavaScript, React.js, Redux, Material-UI, Axios, Jest, Playwright, React-Testing-Library, DataDog

- Developed a dashboard for managing teams and team members of clients engineering teams using react, redux, MUI, and ag-grid-react.
- Wrote full coverage unit and integration tests using jest, react-testing-library, and playwright to improve scalability and code confidence.
- Configured Datadog to leverage real user monitoring and session replays.
